That will teach me not to search online for a cheap used BMW London. I guess I was very naïve, having always had the luxury of company cars. When I decided to set up my own business, I had a really low budget to allocate to transport but I still wanted to maintain a good and successful image to prospective clients. I bought my 318i 4 Door Saloon from a private seller advertising in the local newspaper. My friend warned me it was too good to be true but I was just blinded by the great spec and the cheap price. Six months down the line and everything is going wrong. I should have gone to Big Motoring World in West Malling, Kent.
